

Visit the Swiss Mountaineers in Victoria, BC!

by Scott Chamber for The Q Wealth Report

With large financial institutions falling like bowling pins and the US Congress on the verge of the largest US bailout since the Great Depression of the 30s, the array of bad news flowing from financial world on a daily basis is dizzying.

In the context of current economic and financial market conditions, we expect the potential for a number of surprises coming out of left field that you need to beware of. With consideration to the importance of fully understanding the underlying issues at play and their implications, we have decided to EXTEND the number of registrations admitted for our upcoming briefing in Victoria, BC, Canada for October 3, 2008. We had already reached our set limit of 30 registered attendees in Victoria, but we feel the conditions warrant the extension for a few more.
